

Langman's Medical Embryology
14th Edition
Author: T.W. Sadler PhD
Publication Date: November 6, 2018

Language: English
ISBN/ISSN: 9781496383907
Pages: 456

Vibrantly illustrated with full-color diagrams and clinical images, Langman's Medical Embryology, 14th Edition helps medical, nursing, and health professions students confidently develop a basic understanding of embryology and its clinical relevance. Concise chapter summaries, captivating clinical correlates boxes, clinical problems, and a clear, concise writing style make the subject matter accessible and engaging to students throughout their courses.

Updated content reflects the latest clinical findings on the effects of the Zika virus, urogenital system disorders, and more.

Clinical Correlates boxes tie clinically relevant content to case-based scenarios students may encounter in practice.

More than 400 full-color illustrations, micrographs, and clinical images clarify key aspects of embryonic development.

Problems to Solve with accompanying answers help assess student understanding.

Chapter summaries and an expanded glossary reinforce understanding of key development stages, terms, and clinical conditions.

Illustrated Development Chart provides visually guides students through the stages of embryonic development at a glance.

Updated online review questions with answers help students test their understanding and identify areas of weakness.

Preface

Introduction / Embryology: Clinical Relevance and Historical Perspective

Part 1 • General Embryology

Chapter 1 • Introduction to Molecular Regulation and Signaling

Gene Transcription

DNA Methylation Represses Transcription

Other Regulators of Gene Expression

Induction and Organ Formation

Cell Signaling

Signal Transduction Pathways

Paracrine Signaling

Juxtacrine Signaling

Paracrine Signaling Factors

Fibroblast Growth Factors

Hedgehog Proteins

WNT Proteins

The TGF- β Superfamily

Other Paracrine Signaling Molecules

Key Signaling Pathways for Development

Sonic Hedgehog: Master Gene for Embryogenesis

The Planar Cell Polarity: Convergent Extension Pathway

The *Notch* Pathway

Summary

Chapter 2 • Gametogenesis: Conversion of Germ Cells into Male and Female Gametes

Primordial Germ Cells

The Chromosome Theory of Inheritance

Mitosis

Meiosis

Crossover

Polar Bodies

Morphological Changes during Maturation of the Gametes

Oogenesis

Maturation of Oocytes Begins Before Birth

Maturation of Oocytes Continues at Puberty

Spermatogenesis

Maturation of Sperm Begins at Puberty

Spermiogenesis

Summary

Chapter 3 • First Week of Development: Ovulation to Implantation

Ovarian Cycle

Ovulation

Corpus Luteum

Oocyte Transport

Corpus Albicans

Fertilization

Phase 1: Penetration of the Corona Radiata

Phase 2: Penetration of the Zona Pellucida

Phase 3: Fusion of the Oocyte and Sperm Cell Membranes

Cleavage

Blastocyst Formation

Epiblast, Hypoblast, and Axis Formation

Uterus at Time of Implantation

Summary

Chapter 4 • Second Week of Development: Bilaminar Germ Disc

Day 8

Day 9

Days 11 and 12

Day 13

Summary

Chapter 5 • Third Week of Development: Trilaminar Germ Disc

Gastrulation: Formation of Embryonic Mesoderm and Endoderm
Formation of the Notochord
Establishment of the Body Axes
Fate Map Established during Gastrulation
Growth of the Embryonic Disc
Further Development of the Trophoblast
Summary

Chapter 6 • Third to Eighth Weeks: The Embryonic Period

Derivatives of the Ectodermal Germ Layer
Molecular Regulation of Neural Induction
Neurulation
Neural Crest Cells
Molecular Regulation of Neural Crest Induction
Derivatives of the Mesodermal Germ Layer
Paraxial Mesoderm
Molecular Regulation of Somite Formation
Somite Differentiation
Molecular Regulation of Somite Differentiation
Intermediate Mesoderm
Lateral Plate Mesoderm
Blood and Blood Vessels
Molecular Regulation of Blood Vessel Formation
Derivatives of the Endodermal Germ Layer
Patterning of the Anteroposterior Axis: Regulation by Homeobox Genes
External Appearance during the Second Month
Summary

Chapter 7 • The Gut Tube and the Body Cavities

A Tube on Top of a Tube
Formation of the Body Cavity
Serous Membranes
Diaphragm and Thoracic Cavity
Formation of the Diaphragm
Summary

Chapter 8 • Third Month to Birth: The Fetus and Placenta

Development of the Fetus
Monthly Changes
Time of Birth
Fetal Membranes and Placenta
Changes in the Trophoblast
Chorion Frondosum and Decidua Basalis
Structure of the Placenta
Full-Term Placenta
Circulation of the Placenta
Function of the Placenta
Exchange of Gases
Exchange of Nutrients and Electrolytes
Transmission of Maternal Antibodies
Hormone Production
Amnion and Umbilical Cord
Placental Changes at the End of Pregnancy
Amniotic Fluid
Fetal Membranes in Twins
Dizygotic Twins
Monozygotic Twins
Parturition (Birth)
Summary

Chapter 9 • Birth Defects and Prenatal Diagnosis

Birth Defects
Types of Abnormalities
Environmental Factors
Principles of Teratology
Infectious Agents
Other Viral Infections and Hyperthermia
Radiation
Pharmaceutical Drugs and Chemical Agents
Illicit Drugs, Alcohol, and Cigarettes
Hormones

- In Vitro Fertilization
- Maternal Disease
- Nutritional Deficiencies
- Obesity
- Hypoxia
- Heavy Metals
- Male-Mediated Teratogenesis
- Prenatal Diagnosis
 - Ultrasonography
 - Amniocentesis
 - Chorionic Villus Sampling
 - Cordocentesis or Percutaneous Umbilical Blood Sampling
 - Maternal Serum Screening
 - Noninvasive Prenatal Screening
- Fetal Therapy
 - Fetal Transfusion
 - Fetal Medical Treatment
 - Fetal Surgery
 - Stem Cell Transplantation and Gene Therapy
- Summary

Part 2 • Systems-Based Embryology

Chapter 10 • The Axial Skeleton

- Skull
 - Neurocranium
 - Membranous Neurocranium
 - Newborn Skull
 - Cartilaginous Neurocranium or Chondrocranium
 - Viscerocranium
- Vertebrae and the Vertebral Column
- Ribs and Sternum
- Summary

Chapter 11 • Muscular System

- Striated Skeletal Musculature
- Innervation of Axial Skeletal Muscles
- Skeletal Muscle and Tendons
- Molecular Regulation of Muscle Development
- Patterning of Muscles
- Head Musculature
- Limb Musculature
- Cardiac Muscle
- Smooth Muscle
- Summary

Chapter 12 • Limbs

- Limb Growth and Development
- Limb Musculature
 - Molecular Regulation of Limb Development
- Summary

Chapter 13 • Cardiovascular System

- Establishment and Patterning of the Primary Heart Field
- Formation and Position of the Heart Tube
- Formation of the Cardiac Loop
- Molecular Regulation of Cardiac Development
- Development of the Sinus Venosus
- Formation of the Cardiac Septa
 - Septum Formation in the Common Atrium
 - Formation of the Left Atrium and Pulmonary Vein
 - Septum Formation in the Atrioventricular Canal
 - Atrioventricular Valves
 - Septum Formation in the Truncus Arteriosus and Conus Cordis
 - Septum Formation in the Ventricles
 - Semilunar Valves
- Formation of the Conducting System of the Heart
- Vascular Development

- Arterial System
 - Aortic Arches
 - Vitelline and Umbilical Arteries
 - Coronary Arteries
- Venous System
 - Vitelline Veins
 - Umbilical Veins
 - Cardinal Veins
- Circulation Before and After Birth
 - Fetal Circulation
 - Circulatory Changes at Birth
 - Lymphatic System
- Summary

Chapter 14 • Respiratory System

- Formation of the Lung Buds
- Larynx
- Trachea, Bronchi, and Lungs
- Maturation of the Lungs
- Summary

Chapter 15 • Digestive System

- Divisions of the Gut Tube
- Molecular Regulation of Gut Tube Development
- Mesentery
- Foregut
 - Esophagus
 - Stomach
 - Duodenum
 - Liver and Gallbladder
- Molecular Regulation of Liver Induction
- Pancreas
 - Molecular Regulation of Pancreas Development
- Midgut
 - Physiological Herniation
 - Rotation of the Midgut
 - Retraction of Herniated Loops
 - Mesenteries of the Intestinal Loops
- Hindgut
- Summary

Chapter 16 • Urogenital System

- Urinary System
 - Kidney Systems
 - Pronephros
 - Mesonephros
 - Metanephros: The Definitive Kidney
 - Collecting System
 - Excretory System
 - Molecular Regulation of Kidney Development
 - Position of the Kidney
 - Function of the Kidney
 - Bladder and Urethra
- Genital System
 - Gonads
 - Testis
 - Ovary
 - Genital Ducts
 - Indifferent Stage
 - Genital Ducts in the Male
 - Genital Ducts in the Female
 - Molecular Regulation of Genital Duct Development
 - Vagina
 - External Genitalia
 - Indifferent Stage
 - External Genitalia in the Male
 - External Genitalia in the Female
 - Descent of the Testes
 - Descent of the Ovaries
- Summary

Chapter 17 • Head and Neck

Pharyngeal Arches

- First Pharyngeal Arch
- Second Pharyngeal Arch
- Third Pharyngeal Arch
- Fourth and Sixth Pharyngeal Arches

Pharyngeal Pouches

- First Pharyngeal Pouch
- Second Pharyngeal Pouch
- Third Pharyngeal Pouch
- Fourth Pharyngeal Pouch

Pharyngeal Clefts

Molecular Regulation of Facial Development

Tongue

Thyroid Gland

Face

Intermaxillary Segment

Secondary Palate

Nasal Cavities

Teeth

Molecular Regulation of Tooth Development

Summary

Chapter 18 • Central Nervous System

Spinal Cord

Neuroepithelial, Mantle, and Marginal Layers

Basal, Alar, Roof, and Floor Plates

Histological Differentiation

- Nerve Cells
- Glial Cells
- Neural Crest Cells
- Spinal Nerves
- Myelination

Positional Changes of the Cord

Molecular Regulation of Nerve Differentiation in the Spinal Cord

Brain

Rhombencephalon: Hindbrain

Myelencephalon

Metencephalon

Cerebellum

Mesencephalon: Midbrain

Prosencephalon: Forebrain

Diencephalon

Telencephalon

Molecular Regulation of Brain Development

Cranial Nerves

Autonomic Nervous System

Sympathetic Nervous System

Parasympathetic Nervous System

Suprarenal (Adrenal) Gland

Summary

Chapter 19 • Ear

Internal Ear

Sacculle, Cochlea, and Organ of Corti

Utricle and Semicircular Canals

Middle Ear

Tympanic Cavity and Auditory Tube

Ossicles

External Ear

External Auditory Meatus

Eardrum or Tympanic Membrane

Auricle

Hearing

Summary

Chapter 20 • Eye

Optic Cup and Lens Vesicle
Retina, Iris, and Ciliary Body
Lens

Choroid, Sclera, and Cornea

Vitreous Body

Optic Nerve

Molecular Regulation of Eye Development

Summary

Chapter 21 • Integumentary System

Skin

Epidermis

Dermis

Hair

Fingernails and Toenails

Sweat Glands

Mammary Glands

Summary

Part 3 • Appendix

Answers to Problems

Figure Credits

Glossary of Key Terms

Index
